CRYO-S Painless

Advanced Cryoneurolysis System

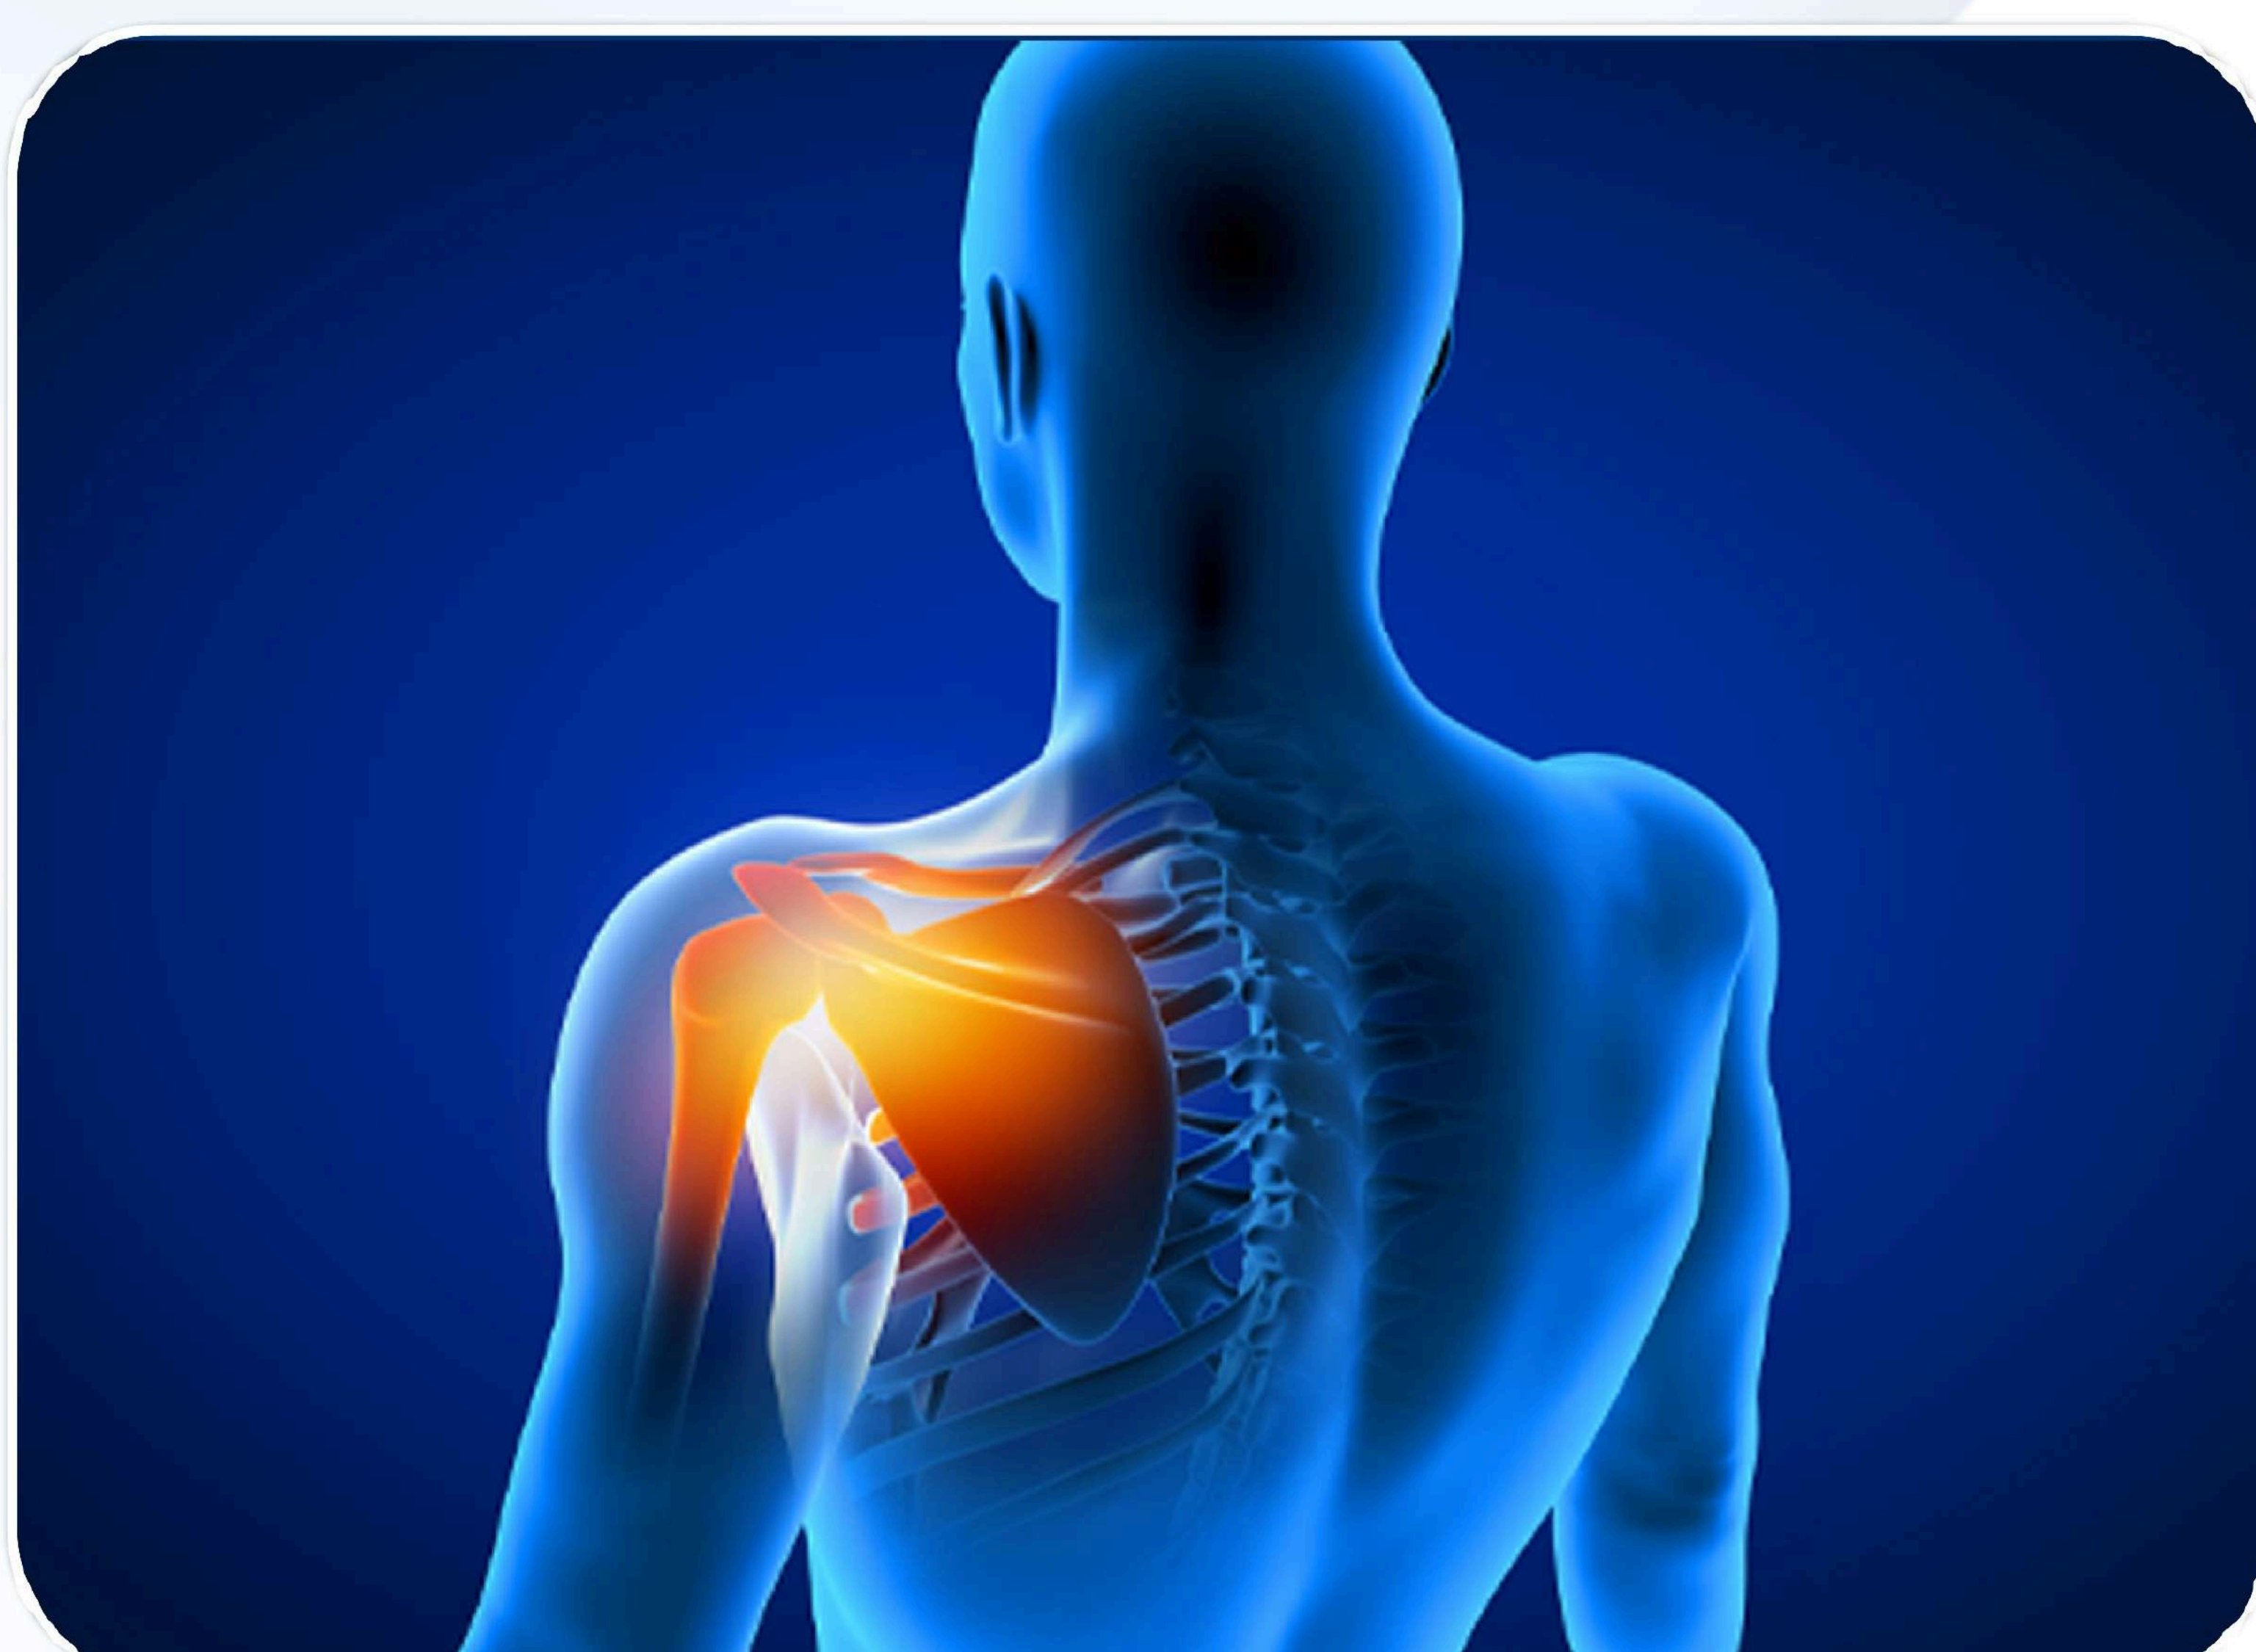

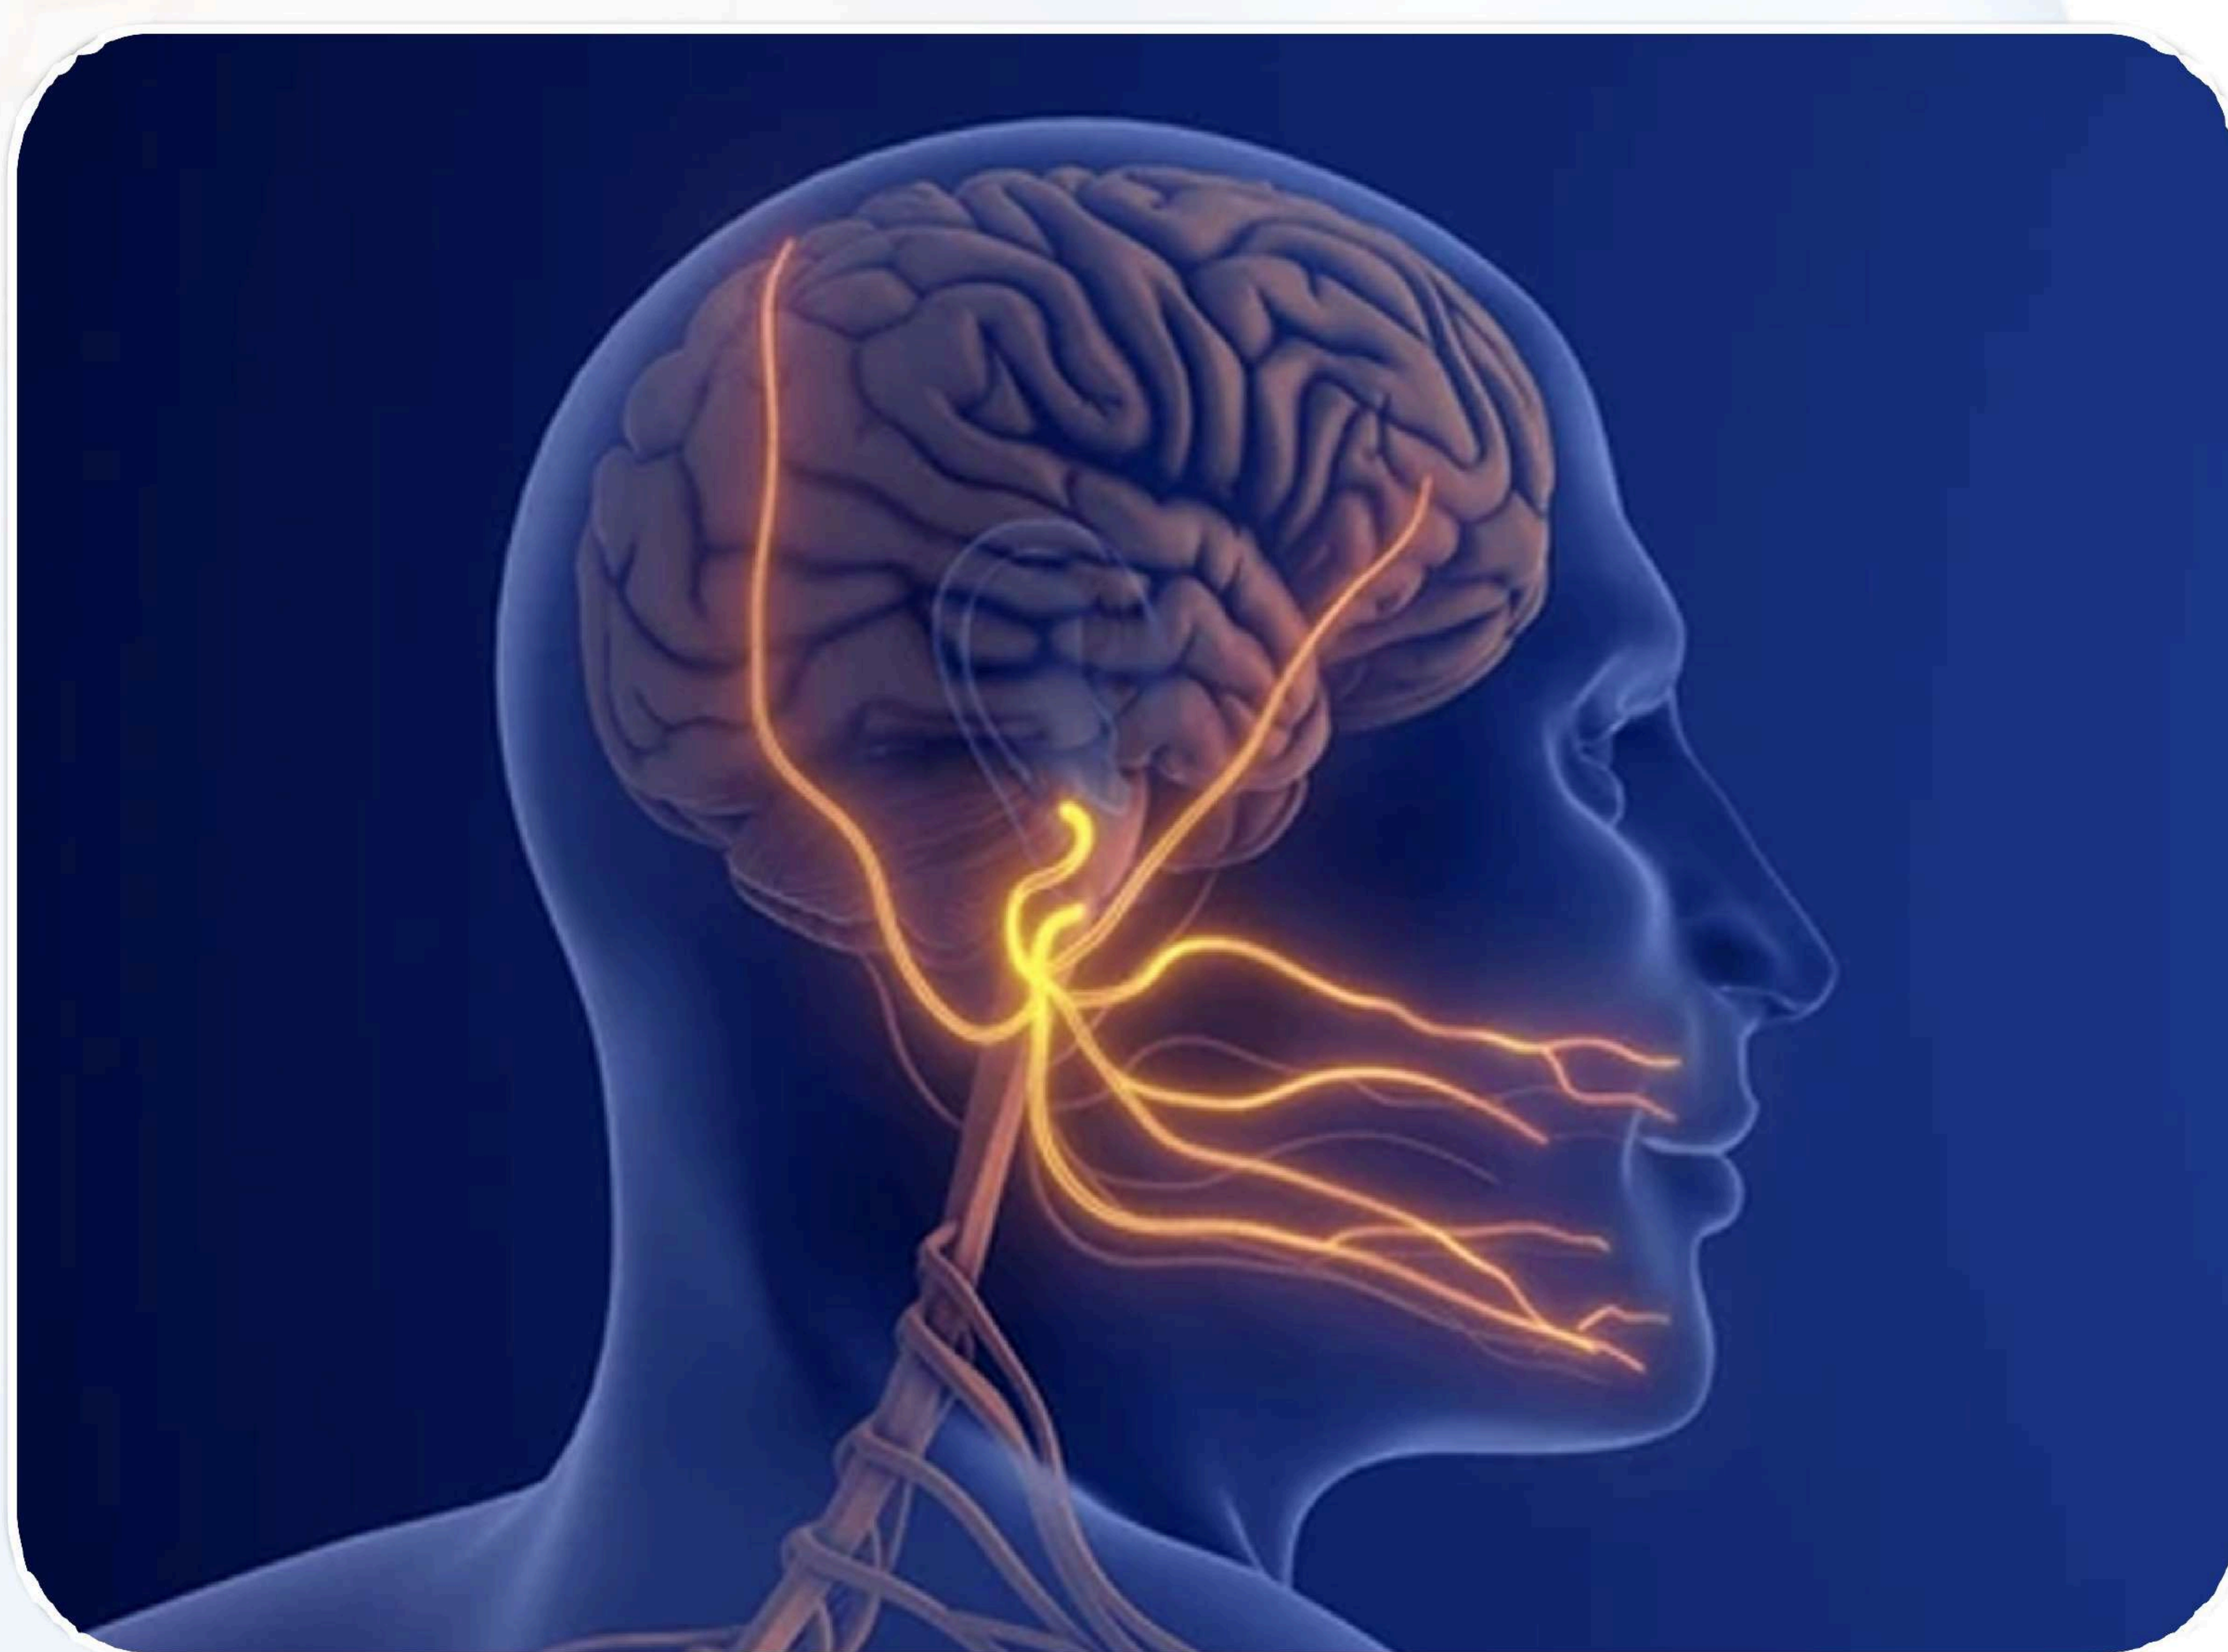

An advanced system for anesthesiologists, orthopedists, neurosurgeons, and pain specialists, **CRYO-S Painless** provides long-lasting, non-surgical pain relief through controlled cold therapy without opioids or invasive surgery.

Key Features

- Minimally invasive & scar-free
- Pacemaker-safe and repeatable
- Quick recovery, no hospitalization
- Long-lasting relief (6 months–2 years)

Applications

- Chronic pain (shoulder, knee, hip, sacroiliac joint)
- Post-surgical neuralgia, thoracic & abdominal pain
- Diabetic neuropathy, Morton's neuroma
- Muscle spasticity (post-stroke, cerebral palsy)

Cryo-S Painless Surgeries & Indications by Department

1. Pain Management Physicians

Cryoanalgesia is most widely used here

- ♥ Intercostal neuralgia
- ♥ Trigeminal neuralgia
- ♥ Occipital neuralgia
- ♥ Genicular nerve cryoablation (knee pain)
- ♥ Ilioinguinal & iliohypogastric neuralgia
- ♥ Pudendal neuralgia
- ♥ Suprascapular nerve cryoablation
- ♥ Brachial plexus pain
- ♥ Piriformis syndrome
- ♥ Morton's neuroma
- ♥ Peripheral nerve entrapment pain
- ♥ Facet joint-related pain (medial branch cryoablation)
- ♥ Post-thoracotomy pain
- ♥ Chronic shoulder pain (nerve cryoablation)
- ♥ Chronic low back pain
- ♥ Sciatic nerve cryoablation (non-destructive)

2. Anesthesiologists

Cryo-S Painless is used for postoperative pain control

- ♥ Post-surgical nerve pain relief
- ♥ Post-thoracotomy pain
- ♥ Rib fracture pain
- ♥ Post-hernia repair pain
- ♥ Peripheral nerve blocks with cryoanalgesia (long-duration alternative)
- ♥ Post-amputation stump pain
- ♥ Post-joint replacement chronic pain

3. Orthopedic Surgeons

Cryo-S supports joint and musculoskeletal pain therapies:

- ♥ Knee osteoarthritis – genicular nerve cryoablation
- ♥ Shoulder pain – suprascapular & axillary nerve cryoablation
- ♥ Rotator cuff-related nerve pain
- ♥ Elbow pain – lateral epicondylitis (tennis elbow)
- ♥ Ankle & foot nerve pain
- ♥ Morton's neuroma
- ♥ Post-ACL surgery chronic pain
- ♥ Hip joint pain – femoral & obturator nerve cryoablation
- ♥ Chronic post-fracture pain

4. Neurosurgeons

Used for nerve-related chronic pain

-  Trigeminal neuralgia (selected peripheral branches)
-  Occipital neuralgia
-  Intercostal neuralgia
-  Peripheral neuropathic pain
-  Post-spine surgery neuropathic pain (failed back surgery syndrome)
-  Brachial plexus neuropathy
-  Neuropathic facial pain
-  Neuroma pain after surgery

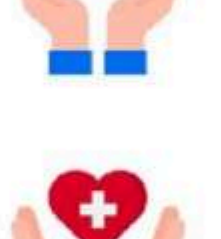

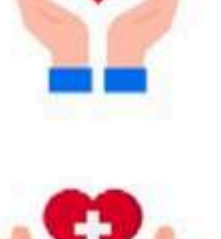

5. Spine Surgeons

Cryo-S Painless helps for spine-related nerve pain:

-  Cervical radiculopathy (selected nerve branches)
-  Lumbar radiculopathy (non-destructive nerve interruption)
-  Facet joint-related pain (medial branch cryoablation)
-  SI joint-related nerve pain
-  Chronic post-laminectomy pain
-  Failed Back Surgery Syndrome (FBSS)
-  Intercostal nerve pain after thoracic spine surgery

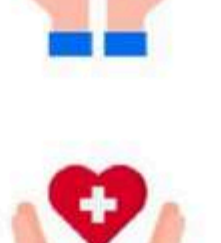

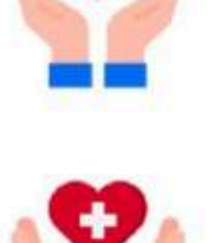

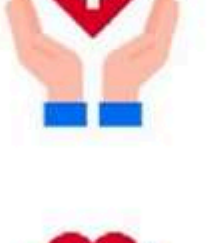

6. Interventional Radiologists

IRs use cryoablation in tumor & nerve procedures:

-  Peripheral nerve cryoablation for chronic pain
-  Cryoablation for small soft tissue tumors
-  Cryoablation for neuroma
-  Cryoanalgesia for rib fracture pain
-  Cryoablation in intercostal neuralgia
-  Post-varicose vein laser nerve pain

7. Oncology Surgeons

Cryo-S Painless plays a role in cancer pain management:

-  Post-mastectomy neuropathic pain
-  Post-thoracotomy cancer pain
-  Intercostal nerve cryoablation for chest wall tumors
-  Cryoablation of peripheral tumor-related nerve pain
-  Post-cancer surgery nerve entrapment pain
-  Brachial plexus cancer-related neuropathy
-  Soft tissue tumor-related nerve pain

”

WHY

PrimeBridge

Your Partner in Safe,
Specialized Surgical Care

At PrimeBridge, we are committed to delivering advanced surgical solutions through experienced professionals, modern technology, and a strong focus on patient well-being. Our mission is to make surgery safer, more accessible, and more personalized ensuring every patient receives the care they truly deserve.

PrimeBridge Provides

- ✓ Personalized Care from Consultation to Recovery
- ✓ Transparent, Ethical, and Patient-Centric Approach
- ✓ Supportive Post-Surgery Follow-Up and Guidance
- ✓ Experienced Surgical Specialists
- ✓ Advanced & Minimally Invasive Procedures
- ✓ Trusted Network of Hospitals & Surgeons
